

HYBRIDA

D8.2 : Newsletters and leaflets

Editors: Eleni Spyrou, Vana Stavridi, Costas A. Charitidis

HYBRIDA

Embedding a comprehensive ethical dimension to organoid-based research and resulting technologies

Grant Agreement no.: 101006012

Lead contractor for this deliverable: Costas A. Charitidis

**Deliverable factsheet:**

Project Title:	HYBRIDA
Title of Deliverable:	D8.2 Newsletters and leaflets
Work Package:	WP 8
Dissemination level:	Public (PU)
Due date according to contract:	M12
Actual submission date:	7/2/2022
Editor(s):	Eleni Spyrakou, Costas A. Charitidis
Contributor(s):	Panagiotis Kavouras
Reviewer(s):	Eleni Spyrakou, Costas A. Charitidis
Approved by	Jan Helge Solbakk

Document metadata:

3 Newsletters and leaflets: Next steps	6

1 Introduction

Newsletters and leaflets constitute basic means of communication and dissemination of HYBRIDA’s core information material, as well as of the completed and planned activities which promote the results and various outputs of the project, further to press releases and scientific publications. Since HYBRIDA is a CSA (Coordination and support actions) project, dissemination and communication material and activities are in the core of the project’s development and progress. Furthermore, due to the project’s topic and the composition of the consortium, which spans a wide range of professions and principles, both technical and theoretical (organoid research experts, engineering, ethics, philosophy, theology, law etc.), the variety of events and activities in which HYBRIDA can be addressed is wide, giving the opportunity to raise awareness on the project’s developments and increase visibility on multiple levels, while interacting with various types of stakeholders.

D8.2: Newsletters and leaflets contains the 1st edition of the project’s leaflet which provides basic information about HYBRIDA, as well as an overview of the next steps on newsletters’ design.

HYBRIDA

2 The project's leaflet

The 2-page leaflet contains basic information about HYBRIDA including the aims and purpose of the project, the challenge it faces and the project's roadmap. It further includes the coordinator's contact details and the consortium.

HYBRIDA leaflet's first page:

 HYBRIDA Responsible organoid-based research

HYBRIDA

Details:

PROJECT REFERENCE: 101006012
 PROJECT ACRONYM: HYBRIDA
 DURATION: 1 February 2021 – 31 January 2024
 TOPIC: Swafs-28-2020
 TITLE: Embedding a comprehensive ethical dimension to organoid-based research and resulting technologies

 The project leading to this application has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101006012

Embedding a comprehensive ethical dimension to organoid-based research and resulting technologies

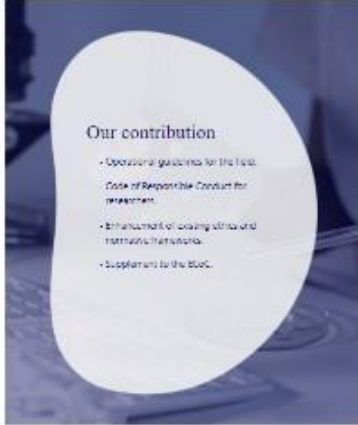

HYBRIDA leaflet's second page:

About

HYBRIDA is a 5-year Science With and For Society (SWiF) project funded under H2020-ERC-Synergy coordinated by the University of Duisburg-Essen.

The main objective is to develop a comprehensive regulatory framework for organoid research and organoid related technologies.

Our contribution

- Operational guidance for the field
- Code of Responsible Conduct for researchers
- Enhancement of existing ethical and international frameworks
- Supplements for the EUCC

HYBRIDA

2021

1st Stage Explore Activities

- WP1, WP2, WP3: Visiting activities
- WP4: Engagement activities
- WP5, WP6: Main outcomes
- WP7: Coordination with SWiF-23

2022

2nd Stage Consultation And Co-Creation

- WP4: Engagement activities
- WP5, WP6: Main outcomes
- WP7: Coordination with SWiF-23

2023

3rd Stage Assessment And Validation

- WP4: Engagement activities
- WP5, WP6: Main outcomes
- WP7: Coordination with SWiF-23

The challenge

The project aims to address how the conceptual, epistemological and regulatory uncertainties arise in organoid research, and to develop a conceptual and regulatory framework able to overcome the 'persons vs things' dualism.

From this follows also the need to communicate the potential and possible pitfalls of organoid research in ways that convey realistic instead of hyped scenarios.

3 Newsletters and leaflets: Next steps

NTUA has collected inputs from all HYBRIDA partners regarding events in which HYBRIDA consortium members have participated or plan to participate during the 1st and 2nd year of the project (February 2021 - December 2022), as listed in **D8.5: Events**. These inputs will be, also, utilised in order to produce newsletters and leaflets for future activities, and will be further enriched with the project's progress and relevant updates external to HYBRIDA. They will be available on the project's website and in printed-hard copy form, in order to be distributed in conferences, workshops and public outreach events which will be organized in 2022. The design and aesthetics will be in line with those of the poster and oral presentation templates, as well as with the project's website.
